

Genee OPS i5 & i7

The Future of interoperability in touchscreen technology

Genee OPS i5 & i7

You can simply just plug in the OPS unit and experience all the benefits of working in a PC environment. The OPS unit will enable you to maximise the use of your archived resources and you can add your own media content directly to your presentation.

OPS (Open Pluggable Specification) enables the ability to upgrade your existing touchscreens to your individual business requirements, while helping to future-proof technology investments. The OPS unit can accommodate further, as it can be interchangeable with other devices.

With an OPS system, you can easily access the essentials for your business such as Windows, Office 365 and Skype for Business. The OPS unit comes available with the choice of either an Intel i5 or an i7 processor; and then there is the option to upgrade.

Available with Windows 10 Pro (Non License)

Key Features & Benefits

- 

User Friendly
Enabling easier installation, use and maintenance of touch screens when used in the classroom, board room or even as a digital sign in the commercial world.
- 

Intelligent Enhancement
With the OPS unit, a screen can operate more effectively in connecting and working with various other programmes and other devices as a PC would.
- 

2 in 1
With the OPS unit, screens can operate as a 2 in 1 device with all the features of a high quality touch screen and a strong performing PC.
- 

Multiple Processor Options
The OPS unit comes with either an Intel i5 or an i7 processor.
